29 Rue Villaret de Joyeuse 29200, Brest - France (rightary) (+33) 0752109900 ✓ odilon.houndegnonto@gmail.com

Beninese - Born on December 16th, 1991 at Sey (Benin) https://ojhoundegnonto.github.io/

My research interests are focused on ocean physics with linkage and applications for societal needs, especially Rivers plumes dynamics, thermohaline stratification of the upper ocean layers, the contribution of temperature and salinity on sea level changes, the role of stratification on the sea surface temperature conditions, ocean heat content variations, and the response of the ocean in the dynamic of climate through air-sea interaction from regional to global scales. I am used to In situ and remote sensing observations, with the combined of numerical model simulation output.
